- Message: Many students dream is to get a good job and I can proudly say that I made that dream come true by getting a core job in reputed MNC. I started my career in VAYU company which is a start up, with package of 3 LPA, where our work related to optical & networking. With 2 years' experience in Vayu, I got an offer from INFINERA as a SW QA ENGR 2 with package of 13.5LPA. This is all because of my college. My college supported me a lot in various ways. Our professors mainly focused on the concepts and gave valuable inputs which helped me to get campus placement. Besides theoretical inputs, the well-equipped labs gave much scope for improving my practical knowledge. The co-curricular and extra-curricular activities organized by the college honed my interpersonal skills which really helped me to adapt to the multicultural ambience in my working environment. I can proudly say that MIC is not just an educational institute but it is an 'EMOTION' to all the Alumni.

Extremely amiable professors here at MIC impart both knowledge and moral values in the classroom-a much needed combination for today's world. This helped me in unleashing my true capabilities and transforming into a better individual. Splendid seminar hall and auditorium, fully furnished labs and library are the cherries on the cake. I entered MIC as a naive person. But I left MIC with all the skills required to face the actuality.

The time which I spent in MIC was really enjoyable and the memorable. I just want to tell my juniors is that college is all about building friendships, building experiences, building connections, building relationships and more importantly building your future. It is a phase which will make you answer a lot of life's questions. In life, nobody will help you until you starts helping yourself. Your current situation gives an opportunity to re-evaluate what you want to become.

MIC college made me strong and independent girl. I was the class representative in ECE departments that helped me to develop leadership qualities in me.
I am thankful to all the teachers who supported and directed us throughout our engineering. I participated in many competitions which helped me to improve my confident levels. I would like to express my sincere gratitude to the placement cell for guiding me and providing me a right platform for my professional career.

I would like to suggest my juniors that first you decide in which field you have interest and want to work for eg -software, hardware, embedded or VLSI etc., and then lead towards that direction.
In today's world, we have everything on internet to gain knowledge and improve your skills. You can pursue many MOOC courses.
Based on your skills apply for interview. Finally one day will be yours.
Cheers and good luck kiddos.

My experience at MIC was great, fun and memorable one. It helped me to discover more about myself. Faculty members are very supportive and encourage students to achieve their goals. MIC not only helped me to gain academic knowledge but also helps students to improve their communication skills. Placement training is an important segment of the college which helped me to get selected in MNC company and instil confidence in me.
I'm grateful to MIC College for making me a better person.

My college supported me a lot in various ways. Our professors mainly focused on the concepts and gave valuable inputs which helped me to get camous placement. Besides theoretical inputs, the well-equipped labs gave much scope for improving my practical knowledge. The co-curricular and extra-curricular activities organized by the college honed my interpersonal skills which really helped me to adapt to the multicultural ambience in my working environment. I can proudly say that MIC is not just an educational institute but it is an 'EMOTION' to all the Alumni.
