MICT College Library is fully automated by using NewGenLib software (Version 3.3) which is an integrated multi-tier library management system that supports all in-house operations of the Library.

Library Vision

Our vision is to establish a technology-driven, user-centric, and innovative platform that serves the academic community. We aspire to foster a culture of lifelong learning and research among our students, empowering them with valuable resources and opportunities for intellectual growth

Library Mission

1. To provide immaculate access to comprehensive and quality resources in print or digital format in support of teaching, learning and research need.

2. By encouraging professional and individual development, Library maintain a healthy and helpful atmosphere with staff and students.

3. Develop guidelines for library users to provide right book to the right user at right time in right format.

Library Goals

1. Maintain the rich collection of scholarly materials in the form of physical and digital resources.

2. Library offers information access and specialized custom service to ensure rapid delivery of information to meet customers' unique information.

3. Prioritize the acquisition of materials related to emerging areas of engineering.

4. To fulfill Library users' information needs in a timely and economical manner.

Library Collection

The MICT Library boasts an extensive and diverse collection of resources, encompassing traditional formats such as books, periodicals, journals, project reports, and CDs, as well as modern digital materials like e-books and e-journals. Serving a wide range of users, including students, faculty, and supporting staff, the library plays a pivotal role in meeting their informational needs.

The library's holdings are particularly robust in the fields of Science and Technology, covering specialized areas such as Computer Science, Artificial Intelligence & Machine Learning, Data Science, Electrical and Electronics Engineering, Electronics and Communication Engineering, Mechanical Engineering, Civil Engineering, Reasoning and Aptitude, Science & Humanities, and Management. Beyond the general collection, the library caters to diverse interests by offering extracurricular and competitive examination materials like GATE and TOFEL.

Distinguished by its specialized sections, the library houses a valuable assortment of reference books, project reports, bound volumes of journals, standards, compact disks, and a Book Bank. The Central Library operates on an open-access basis, welcoming all users. On the ground floor, the Circulation section, Digital Library, and Reprography Center facilitate access to resources, while the first floor hosts reference books, back volumes, printed magazines, journals, and scholarship books.

The library's digital infrastructure is impressive, featuring a Digital Library equipped with over 50 systems and internet access. This enables students and faculty to explore e-resources and databases seamlessly. Complementing this, the library provides high-speed Wi-Fi, ensuring connectivity for both students and faculty members. Furthermore, the library employs a biometric login system to meticulously record and analyze the daily physical footfalls, contributing to a comprehensive understanding of user engagement and preferences..

Library Automation

Details of Integrated Library Management Software (ILMS)

MICT Library has computerized its house-keeping activities using NewGenLib software which is an integrated multi-tier library management system that supports all in-house operations of the Library. The NewGenLib consists of modules on Acquisition, Technical processing, Circulation, Serial management, Administration, Reports, Queries and Utilities. Barcode Technology is used in transactions.

More than 60000 Bibliographic records of books available in the Library can now be accessed through the NewGenLib **OPAC (Online Public Access Catalogue)**. The database of books available in the Library is being updated on a day-to-day basis with details of recently acquired books. Records of all the Library patrons have also been created in the NewGenLib software. All the books and library resources are bar-coded, as well as patrons ID cards are also bar-coded for computing the per day usage of the library.

Library Database Searching Facility

Library OPAC(Online Public Access Catalogue)Facility

Online Public Access Catalogue is an online database of materials stocked by a library. OPAC is computerized and accessible over the internet from any terminal on campus or, as well as from a terminal in the library. Users can look up papers and all of the bibliographic details about the library's holdings by searching the catalogue. OPAC can also be used to look up books or find out if a journal or CD is available by entering the author's name, subject, keyword, and title in the search box. Users can utilize OPAC to periodically check the status of their accounts and, if necessary, recommend books or books for the library to purchase using their individual login credentials.

There are two types of search facilities. They are

• Basic Search

• Advanced Search

Boolean Operators:

Database and online searching, including OPAC keyword searches, make use of Boolean logic, which uses three basic operators:

AND is used to narrow the results to only those records that contain both search terms

OR is used to expand the search using like-terms.

NOT is used to exclude an element from the search set

For the most precise search, you can combine multiple sets of search terms using Boolean operators.

NewGenLib (Version.3.3) has an extensive list of parameters that a library can set before implementing the functional modules. These include a range of general set up parameters as well as module-specific parameters, e.g., the definition of a patron-item privileges matrix to define loan, renewal limits and overdue charges for various patron categories with respect to different item types.

Different Features in ILMS:

ACQUISITIONS MANAGEMENT

NewGenLib supports different acquisition modes: acquisitions via requests from users, acquisitions via approval purchase; acquisitions via firm orders; and acquisitions via gifts. processing,

TECHNICAL PROCESSING AND DATABASE DEVELOPMENT

NewGenLib is fully compliant with the MARC-21 format for bibliographic records. It allows cataloguers the possibility to describe items at three levels of detail.

CIRCULATION CONTROL

NewGenLib provides all the functionality that is needed in circulation management in a typical library. In addition, however, NewGenLib allows elaborate configuration of privileges to different users in respect of different types of materials.
NewGenLib also allows reservation queues. These can be modified by authorized library staff when needed.

SERIALS MANAGEMENT

NewGenLib' s serials management module is extremely comprehensive and has been crafted with great care to take care of the many complications in this area of library management.

REPORTS, QUERIES AND UTILITIES

NewGenLib provides the possibility to produce many predefined module- specific reports. These reports are management information reports and help the library management to take meaningful decisions

MICT LIBRARY OPAC FACILITY FOR RESOURCE DATABASE

The Online Public Access Catalog (OPAC) is a computerized database containing information about materials available in a library's collection. Accessible from terminals within the library, on-campus terminals, or remotely via the internet, OPAC provides users with the ability to search and retrieve comprehensive bibliographic information for the library's holdings.

Users can efficiently locate documents by conducting searches using various parameters such as author's name, subject, keywords, or title. This user-friendly interface enables patrons to determine the availability of specific items, including books, CDs, or journals. Additionally, OPAC serves as a tool for users to regularly check their account status, and it facilitates the suggestion of new books for library procurement through personalized login accounts.

Whether accessing the system within the library premises or remotely, OPAC enhances the efficiency of information retrieval and empowers users to interact with the library's resources in a seamless and convenient manner.

MICT CENTRAL LIBRARY AND INFORMATION CENTER

Usage Report

In the library, an average of 250 users, comprising both students and faculty members, visit daily to utilize the extensive range of resources available. The library employs a state-of-the-art biometric login system to manage user access efficiently. This cutting-edge technology ensures a secure and streamlined entry process for all library patrons.

The comprehensive data collected through the biometric login system is systematically stored and organized, forming the basis for a detailed monthly report. This report serves as a crucial tool for statistical analysis, allowing library administrators to gain a deep understanding of user trends, peak usage times, and popular resources.

By leveraging this data-driven approach, the library can make informed decisions to optimize resource allocation, improve user experience, and enhance overall operational efficiency.

National Library and Information Services Infrastructure for Scholarly Content (N-LIST)

Background

National Library and Information Services Infrastructure for Scholarly Content (N-LIST) is the college component of e-Shodh Sindhu. It provides access to e-resources to students, researchers and faculty from colleges and other beneficiary institutions through server(s) installed at the INFLIBNET Centre.

Beneficiary Colleges

All college covered under Sections 12(B) and 2(f) of the UGC Act and Non-aided Colleges (except for colleges imparting education in Agriculture, Engineering, Management, Medical, Pharmacy, Dentistry and Nursing) are eligible to access selected e-resources subscribed for the colleges under e-Shodh Sindhu. These resources include 6,150 e-journals and 31,64,309 e-books. All eligible colleges are required to register themselves online.

Electronic Resources Subscribed under the N-LIST Programme

Beneficiary colleges, registered for the N-LIST, a college component of E-Shodh Sindhu, can access 6,150 electronic journals and 31,64,309 electronic books including e-books available through national subscription. Details of e-resources accessible through the INFLIBNET's proxy server (http //nlist.inflibnet.ac.in/) are as follows:
