Integrated Library Management Software(ILMS) Bills(2018-2019)

NewGenLib has an extensive list of parameters that a library can set before implementing the functional modules. These include a range of general set up parameters as well as module-specific parameters, e.g., the definition of a patron-item privileges matrix to define loan, renewal limits and overdue charges for various patron categories with respect to different item types.

Different Features in ILMS:

ACQUISITIONS MANAGEMENT

NewGenLib supports different acquisition modes: acquisitions via requests from users, acquisitions via approval purchase; acquisitions via firm orders; and acquisitions via gifts. processing,

TECHNICAL PROCESSING AND DATABASE DEVELOPMENT

NewGenLib is fully compliant with the MARC-21 format for bibliographic records. It allows cataloguers the possibility to describe items at three levels of detail.

CIRCULATION CONTROL

NewGenLib provides all the functionality that is needed in circulation management in a typical library. In addition, however, NewGenLib allows elaborate configuration of privileges to different users in respect of different types of materials.

NewGenLib also allows reservation queues. These can be modified by authorized library staff when needed.

SERIALS MANAGEMENT

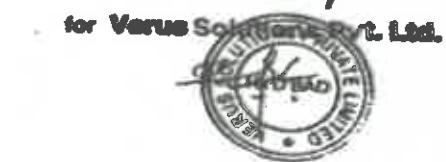

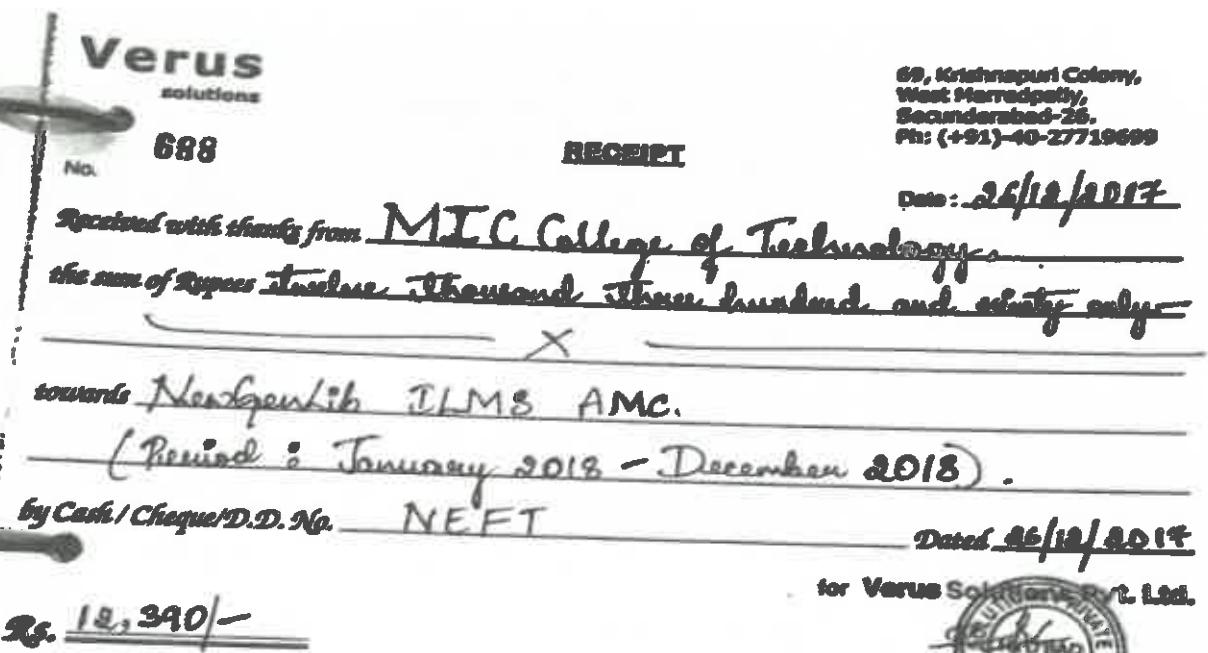

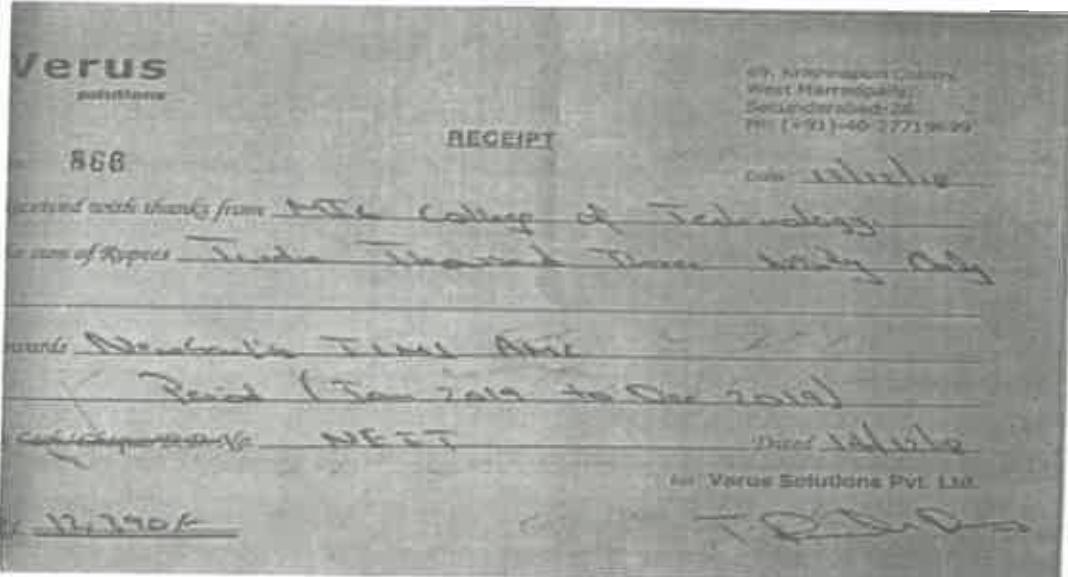

NewGenLib's serials management module is extremely comprehensive and has been crafted with great care to take care of the many complications in this area of library management.

REPORTS, QUERIES AND UTILITIES

NewGenLib provides the possibility to produce many predefined module- specific reports. These reports are management information reports and help the library management to take meaningful decisions

ONLINE PUBLIC ACCESS CATALOGUE (OPAC)

NewGenLib's OPAC, like all contemporary ones is fully Browser based.

MICT LIBRARY OPAC FACILITY FOR RESOURCE DATABASE

The Online Public Access Catalog (OPAC) is a computerized database containing information about materials available in a library's collection. Accessible from terminals within the library, on-campus terminals, or remotely via the internet, OPAC provides users with the ability to search and retrieve comprehensive bibliographic information for the library's holdings.

Users can efficiently locate documents by conducting searches using various parameters such as author's name, subject, keywords, or title. This user-friendly interface enables patrons to determine the availability of specific items, including books, CDs, or journals. Additionally, OPAC serves as a tool for users to regularly check their account status, and it facilitates the suggestion of new books for library procurement through personalized login accounts.

Whether accessing the system within the library premises or remotely, OPAC enhances the efficiency of information retrieval and empowers users to interact with the library's resources in a seamless and convenient manner.

Machine learning

Summary extract: "Machine Learning is rapidly becoming one of the most important areas of general purpose research and development activity within Computing Science. This is reflected in the scale of the academic research area devoted to the subject and the active recruitment of Machine Learning

party fuelled by the increased in the quantity and diversity of measurements we are able to make of the world. A particularly fascinating example arises from the world of new biological measurement technologies that have preceded the sequencing of the first genomes. It is now possible to measure the detailed molecular state of an organism in manners that would have been hard to imagine only a short time ago. Such measurements go far beyond our understanding of these organisms and Machine Learning techniques have been heavily involved in the extraction of useful structures from them. This book

MICT LIBRARY STOCK REGISTER(2018-2019)

MICT Library has built a large collection of documents, consisting of books, periodicals, journals, Project Reports, e- Books e journals, CD's etc. It caters to the needs of large groups of users, including Students, Faculty, and an equally large number of supporting staff.

The Library has a rich collection of printed as well as e-books on Science and Technology including Computer Science, Information Technology, Master of Computer Application, Electrical and Electronics Engineering, Electronics and Communication Engineering, Mechanical Engineering and Civil Engineering. The Library also has a good collection in the areas of Reasoning and Aptitude, Science & Humanities, and Management. Besides General Collection, It includes extracurricular and competitive examination books such as GATE, TOFEL, etc. The Library has segregated specialized collection of Reference books, Project Reports, Bound Volumes of Journals, Standards Compact Disks and Book Bank.

The Central Library is fully Open Access for all. The Ground floor accommodates Circulation section, Digital Library and Reprography Center. The First floor holds Reference books, back volumes, printed magazines and Journals and scholarship books.

MICT CENTRAL LIBRARY AND INFORMATION CENTER

Usage Report (2018-2019)

In the library, an average of 200 users, comprising both students and faculty members, visit daily to utilize the extensive range of resources available. The library employs a state-of-the-art biometric login system to manage user access efficiently. This cutting-edge technology ensures a secure and streamlined entry process for all library patrons.

The comprehensive data collected through the biometric login system is systematically stored and organized, forming the basis for a detailed monthly report. This report serves as a crucial tool for statistical analysis, allowing library administrators to gain a deep understanding of user trends, peak usage times, and popular resources.

By leveraging this data-driven approach, the library can make informed decisions to optimize resource allocation, improve user experience, and enhance overall operational efficiency.

Library Database Searching through NGL (Library Integrated Software)

The screenshot shows the library's integrated software interface. At the top, there is a logo for 'DVR & Dr HS MIC College of Technology'. Below the logo is a navigation bar with links for Home, About, My Library, Discussion, Message, New arrival, Searched, Contact us, and Logout. A search bar at the top right contains the text 'Search' and 'MACHINE LEARNING'. The main content area displays search results for 'Machine Learning'. It shows a thumbnail image of the book 'Machine Learning' by Simon Rogers and Mark Girolami, with a brief description: 'A first course in machine learning / Simon Rogers, Mark Girolami.' Below this, there is detailed information about the book, including its physical description (xv, 268 p. ; 25 cm), subject matter (Machine learning, BUSINESS & ECONOMICS, Statistics, COMPUTER SCIENCE, COMPUTERS, Data mining, Machine learning, Data mining), and authors (Rogers, Simon, Girolami, Mark). There is also a note about the book being part of the 'Machine Learning' collection.

Department of Technical Education,
Office of the Commissioner of Technical Education,
Andhra Pradesh, Vijayawada

Sir,

As per instructions from Govt. of Andhra Pradesh, Department of Technical Education, we subscribed the journal which is published for Polytechnics and second shift polytechnics in Engineering Colleges.

In this regard, an annual institutional subscription of Rs.1000/- paid to Commissioner of Technical Education, from ICICI bank through online on 14/12/2018. Transaction description: CMS/000478498067/SBTETJOURNAL1412.

Please acknowledge us after receiving the payment.

Thanking You.

Yours truly,

Y Sudheer Babu
