Top Rankers – Professional Communication

Here is the list of "Top Rankers in Professional Communication" skill, who has shown an outstanding performance in "Professional Communication Certification Test" from Sanfoundry and have scored either Grade A* (Genius) or A (Excellent) and earned a "Certificate of Merit" for themselves. Certification on Professional Communication is substantially useful for everyone in their Professional Career growth. They can readily showcase their certified skill on Professional Communication topic during job interviews, career discussions and career progressions.

We have also listed down the names of all the people who have taken our Professional Communication Certification Test and have passed the test. So, scroll down the list below and check your position. The list is arranged in descending order of overall marks obtained by the candidate in the test. In case you would like to attempt all types of tests (Practice Tests, Mock Test) or read 1000 Questions on this topic, you can start here or here respectively.

TEACHER DESIGNED MATERIAL TO DEVELOP EFFECTIVE READING SKILLS IN AN ESL CLASSROOM AT GRADUATE LEVEL – A PRAGMATIC STUDY

Dr. M. Srilakshmi, Professor of English, DVR & Dr. HS MIC College of Technology,

Kanchikacherla

Dr. Tummala. Sai Mamata, Lecturer, Department of English, Andhra Loyola,
College, Vijayawada

Abstract

As stated by Tomlinson (1998) materials development refers to anything which is done by writers, teachers or learners to augment sources of language input through various methods which involve students. Generally, teachers try to use all teaching material given in the textbook, but text books are not aimed at any specific group of learners. In most of the cases a textbook does not always meet the variety of conditions in a language class (Ur, 1996; Richards, 2003). So, taking into consideration the demands and needs of students, teachers need to design teaching materials unavailable in the textbooks. It being an important language skill, Reading is sometimes quite a challenging activity because it is not easy to understand a printed text. The specific nature of the discourse, the technical vocabulary and the density of information present in the academic texts make it difficult for the learners to read. Developing reading skills for all academic purposes in ESL learners is a challenging aspect of second language learning. So, designing materials that equip the learners with suitable reading strategies that will guide them to become better readers is the need of the hour. This study emphasizes on teacher designed material that develops reading skills employing pre, while and post reading activities by making reading more communicative.

Keywords: Reading Strategies, Cognitive Reading Processes, Reading Phases, Reading Activities and Young Learners.

Introduction

According to Nunan (1992) teaching materials are often the most substantial and observable component of pedagogy. In general, students are taught English by using available course textbooks. In most of the cases learning materials in the text books are not appropriate to the requirements of the students. As long as teachers have the objectives of teaching, they should not get discouraged by such a situation. Once the teacher has the objective in mind and is familiar with the needs of the learners, he/she can develop his/her own materials for the learners to accomplish the objectives or to fulfill the learner's needs. In engineering education, a need for effective receptive skills has increased besides productive skills. It is universally recognized that reading skill is one of the most important skills for L2 learners to master as it increases learners' knowledge, understanding and IQ. In the present day education system the ability to read and comprehend is crucial to achieve success. Reading comprehension, which broadens learners' knowledge, has always been at a crucial level in the curricula.

ABSTRACT

Image analysis using MATLAB software for characterization of liquid crystalline (LC) phases and phase transition temperatures in hydrogen bonded liquid crystal dimer viz., Succinic acid (SA) (for n=10) with molecular formula nOBA:SA:nOBA is described. SmC, SmX, SmCRE and SmG phase variance is observed by optical textures through Polarized Optical Microscope and which are confirmed by Differential Scanning Calorimetry experimental technique. Influence of flexible end chain length and length of spacer moiety on the LC polymorphism is studied and the results are compared with reports on other HBLC dimers with similar type of molecular structure. Statistical parameters of LC textures based on gray scale intensity as a function of temperature are computed and discussed.

Keywords: Liquid crystal dimer, Hydrogen bond, image analysis, reentrant smectic C; phase transition temperatures,

Top Rankers – Professional Communication

Here is the list of "Top Rankers In Professional Communication" skill, who has shown an outstanding performance in "Professional Communication Certification Test" from Sanfoundry and have scored either Grade A* (Genius) or A (Excellent) and earned a "Certificate of Merit" for themselves. Certification on Professional Communication is substantially useful for everyone in their Professional Career growth. They can readily showcase their certified skill on Professional Communication topic during job interviews, career discussions and career progressions.

We have also listed down the names of all the people who have taken our Professional Communication Certification Test and have passed the test. So, scroll down the list below and check your position. The list is arranged in descending order of overall marks obtained by the candidate in the test. In case you would like to attempt all types of tests (Practice Tests, Mock Test) or read 1000 Questions on this topic, you can start here or here respectively.

TEACHER DESIGNED MATERIAL TO DEVELOP EFFECTIVE READING SKILLS IN AN ESL CLASSROOM AT GRADUATE LEVEL – A PRAGMATIC STUDY

Dr. M. Srilakshmi, Professor of English, DVR & Dr. HS MIC College of Technology,
Kanchikacherla

Dr. Tummala. Sai Mamata, Lecturer, Department of English, Andhra Loyola,
College, Vijayawada

Abstract

As stated by Tomlinson (1998) materials development refers to anything which is done by writers, teachers or learners to augment sources of language input through various methods which involve students. Generally, teachers try to use all teaching material given in the textbook, but text books are not aimed at any specific group of learners. In most of the cases a textbook does not always meet the variety of conditions in a language class (Ur, 1996; Richards, 2003). So, taking into consideration the demands and needs of students, teachers need to design teaching materials unavailable in the textbooks. It being an important language skill, Reading is sometimes quite a challenging activity because it is not easy to understand a printed text. The specific nature of the discourse, the technical vocabulary and the density of information present in the academic texts make it difficult for the learners to read. Developing reading skills for all academic purposes in ESL learners is a challenging aspect of second language learning. So, designing materials that equip the learners with suitable reading strategies that will guide them to become better readers is the need of the hour. This study emphasizes on teacher designed material that develops reading skills employing pre, while and post reading activities by making reading more communicative.

Keywords: Reading Strategies, Cognitive Reading Processes, Reading Phases, Reading Activities and Young Learners.

Introduction

According to Nunan (1992) teaching materials are often the most substantial and observable component of pedagogy. In general, students are taught English by using available course textbooks. In most of the cases learning materials in the text books are not appropriate to the requirements of the students. As long as teachers have the objectives of teaching, they should not get discouraged by such a situation. Once the teacher has the objective in mind and is familiar with the needs of the learners, he/she can develop his/her own materials for the learners to accomplish the objectives or to fulfill the learner's needs. In engineering education, a need for effective receptive skills has increased besides productive skills. It is universally recognized that reading skill is one of the most important skills for L2 learners to master as it increases learners' knowledge, understanding and IQ. In the present day education system the ability to read and comprehend is crucial to achieve success. Reading comprehension, which broadens learners' knowledge, has always been at a crucial level in the curricula.
