### Report on CPA: Programming Essentials in C++

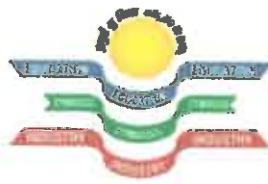

As one of the most popular programming languages, C++ is hailed for its efficiency and its ease for developing games, real-time systems, and applications with graphical libraries. Most of the students of CSE department took the course to learn the basics of programming in the C++ language, and the fundamental notions and techniques it uses. C++ knowledge lends itself well for landing jobs in Security, Networking and IoT fields.

**CPA: Programming Essentials in C++** certification is a professional, high-stakes credential that measures the candidate's ability to perform intermediate - level coding tasks in the C++ language. The major outcome of this course include:

- Learn the syntax, semantics, and basic data type of C++.
- Understand principles of the object-oriented model.
- Implement and write in C++ and resolve typical implementation challenges via language libraries.
- Prepare for the C++ Certified Associate Programmer Certification (CPA).

## Cybersecurity Essentials

Learn valuable security principles to defend networks.

By Cisco Networking Academy

Cyber threats affect us all, and cybersecurity jobs continue to grow. In fact, cybersecurity failure is among the top 5 global risks according to the World Economic Forum Global Risks Report (2021). The world needs diverse, tech-savvy cyber professionals to defend against shrewd digital adversaries.

This course helps the students to get essential knowledge on Cybersecurity.

### Course Objectives and Outcomes:

- Understand security controls for networks, servers and applications.
- Learn valuable security principals and how to develop compliant policies.
- Implement proper procedures for data confidentiality and availability.
- Develop critical thinking and problem-solving skills using real equipment and Cisco Packet Tracer.

### Specifications:

- **Prerequisite:** Introduction to Cybersecurity or equivalent knowledge recommended.
- **Length:** 30 hours
- **Cost:** Free\*
- **Level:** Intermediate
- **Learning Type:** Online self-paced

## Department of Computer Science and Engineering

**Name of the Course:** GIT and GitHub Training

**Facilitator:** ZaranTech

**Mode:** Online Self-paced

### Description

This course is ideal for beginners and will present you to the basics of opting a version control system called Git and a collaboration platform called GitHub. Although this course does not comprise any programming students who have a basic knowledge of programming or simple HTML might find it simpler to follow along. Also experience of utilizing the command line might come in handy though not compulsory as the course is so basic anyone can follow along easily.

### Objectives

**After the completion of this course, Trainee will:**

- Apply branching and merging concepts in your projects
- Configure upstream and downstream for your project
- Create and push merge requests
- Use different merge strategies
- Understand how to work on Open-source projects using Git
- Apply rebasing, reverting and resetting in Git
- Implement different Git workflow strategies in Real-time projects

### Prerequisites

There are no prerequisites for this course, however basic knowledge of Microsoft GUI and Windows Command line will be helpful.

### Course Contents:

- ***Unit 1: Introduction to Git***

1. Version Control/Revision Control system
2. The types of VCS
3. The benefits of using VCS
4. What is GIT?
5. The difference between GIT and other VCS
6. Where to use Git and where not to use it
7. Web Scale architecture

***Unit 2: Getting Started with Git & Its Architecture***

9. Understand Git file life cycle
10. Create Git repository - Local repository and configure it to GitHub
11. Create a repository on GitHub and clone it
12. Understand basic Git commands
13. Git command shortcuts
14. Revisit the Git file lifecycle with Git terminology

***Unit 3: Remote Repositories***

15. Work with remote repositories
16. Configure remote repository on GitHub
17. Understand Git buzzwords
18. Understand remote commands
19. Work with Fork and Pull requests in GitHub
20. Understand Upstream and Downstream

***Unit 4: Branching & Merging***

21. Branching in Git
22. How Git internally manages branches
23. How to switch between branches and different commits
24. Two-way merge and three-way merge
25. Merging Strategies

26. Merging and rebasing (using Source tree)

27. Git tags

28. Difference between branching and tagging

***Unit 5: Git Methodology***

29. What is GIT workflow?

30. Advantages of workflow

31. Different types of workflows in Git

32. Centralized Workflow

33. Feature branch workflow

34. Gitflow Workflow

35. Forking Workflow

36. How to use git in real time opensource projects

***Unit 6: Git Plugin with IDE (Eclipse)***

37. Install Eclipse IDE

38. Install IntelliJ IDE

39. Configure Git plugin

40. Work with Git using IDE

41. How to work with git Workflow on Eclipse IDE

42. Explore GitHub UI options

## **Certified Associate in Python Programming - PCAP**

**PCAP™ – Certified Associate in Python Programming** certification is a professional, high-stakes credential that measures the candidate's ability to perform intermediate-level coding tasks in the Python language, including the ability to design, develop, debug, execute, and refactor multi-module Python programs, as well as measures their skills and knowledge related to analyzing and modeling real-life problems in OOP categories with the use of the fundamental notions and techniques available in the object-oriented approach.

The **PCAP™** certification shows that the individual is familiar with the following concepts: modules, packages, and PIP, character encoding, strings and string processing, generators, iterators, closures, files, file streams, and file processing, exception hierarchies, and exception classes and objects, working with selected Standard Library modules, and the fundamentals of the **Object-Oriented Programming (OOP)** approach.

# PCAP: Programming Essentials in Python

## Statement of Achievement

Presented To:

SHIVANI

Name

During the Cisco Networking Academy® self-paced course, the student has studied the following Skills:

- the universal concepts of computer programming (i.e. variables, flow control, data structures, algorithms, conditional execution, loops, functions, etc.);
- developer tools and the runtime environment;
- the syntax and semantics of the Python language;
- the fundamentals of object-oriented programming and the way they are adopted in Python;
- the means by which to resolve typical implementation problems;
- the writing of Python programs using standard language infrastructure;
- fundamental programming techniques, best practices, customs and vocabulary, including the most common library functions in Python 3;

Data Scientist has been ranked the number one job on Glassdoor and the average salary of a data scientist is over \$120,000 in the United States according to Indeed! Data Science is a rewarding career that allows you to solve some of the world's most interesting problems!

This course is designed for both beginners with some programming experience or experienced developers looking to make the jump to Data Science!

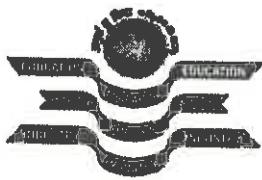

This comprehensive course is comparable to other Data Science bootcamps that usually cost thousands of dollars, but now you can learn all that information at a fraction of the cost! With over 100 HD video lectures and detailed code notebooks for every lecture this is one of the most comprehensive course for data science and machine learning on Udemy!

We'll teach you how to program with Python, how to create amazing data visualizations, and how to use Machine Learning with Python! Here a just a few of the topics we will be learning:

1. Programming with Python
2. NumPy with Python
3. Using pandas Data Frames to solve complex tasks
4. Use pandas to handle Excel Files
5. Visualize Data using Matplotlib and Seaborn

### Who this course is for:

- Beginner Python developer who is curious about Data Science, Not for experienced Data Scientist
- Anyone who want to make career in Data Science, Data analytics
- This course is meant for people with at least some programming experience
- Anyone who plans a career in data scientist
