### Description:

The Department of Training & placement cell organized “Coding classes (Phase-I)”, and is specially meant for Engineering final students. During the Coding phase the design of the software system is translated into a programming language format which is used by a computer, this is the main objective of coding. The aim of the coding is to produce high quality system which can be performed in any situation. The programmer removes all the errors related to syntax and format and all the logical errors which find in the programmer during the coding phase.

### Outcomes of the Event:

- techniques for solving problems
- basic computational concepts and elementary data structures
- the edit-compile-link-run cycle from a user point of view
- testing strategies
- the main activities of software development and their interactions, and some of the major problems of software development

## Feedback Form

Course Name: Coding class Phase - I

Duration of the Course: 24-08-2018 to 28-08-2018

*(Please do not write your name. You are free to respond objectively)*

1. Please give your comments on the usefulness of the Workshop/guest Lecture/Seminar.

In this workshop it is very useful to me. This guest coding In this workshop is very well.

2. Please give your comments on the process/methods during the program.

In this workshop the guides are very help to students to learnt coding. They teach slowly knowledge teach to students.

3. What input areas were most useful to you ("which you have learnt/experienced during the programme)?

The guides gave the notes and PDF, They told the notes very well.

4. In what input areas would you prefer to have further training?

This workshop are very useful to students, so grand to this workshop every branch.

5. Further Comments (if any)

In this workshop we learnt coding. This is used to non core students also. Thank you APEDL.

**Topic:** Coding classes (Phase-I) & Coding classes (Phase-II)

**Date of the Event:** 24.08.2018-28.08.2018 & 11.09.2018-12.09.2018

**Target Audience:** B. Tech All branch students

**Co-ordinator:**Ravi Asst.Professor

**Description:**

The Department of Training & placement cell organized “Coding classes (Phase-I)”, and is specially meant for Engineering final students. During the Coding phase the design of the software system is translated into a programming language format which is used by a computer, this is the main objective of coding. The aim of the coding is to produce high quality system which can be performed in any situation. The programmer removes all the errors related to syntax and format and all the logical errors which find in the programmer during the coding phase.

**Outcomes of the Event:**

- techniques for solving problems
- basic computational concepts and elementary data structures
- the edit-compile-link-run cycle from a user point of view
- testing strategies
- the main activities of software development and their interactions, and some of the major problems of software development

### Description:

The Department of Training & placement cell organized “WIPRO Training”, and is specially meant for engineering final students. The sole objective of imparting aptitude training is to make students able to critically evaluate various real-life situations by resorting to an analysis of key issues and factors. This Aptitude Training helps them to demonstrate various principles involved in solving mathematical problems and thereby reducing the time taken for performing job functions. Logical reasoning is a test of a skill rather than a test of learned knowledge. This is used to determine a student’s critical thinking skills, as well as their ability to use their own knowledge to solve a problem. Soft Skills (a vital portion of an individual’s personality) is an intangible idea in which the qualities like attitude, ability, integrity, reliability, positivity, flexibility, dependability, punctuality, management, cooperation, habits and practices are combined proficiently to capitalize on a person’s work efficacy. Soft Skills do the work of combining all these components in accurate share into skills and shaping them into competencies. The aim of the coding is to produce high quality system which can be performed in any situation. The programmer removes all the errors related to syntax and format and all the logical errors which find in the programmer during the coding phase.

**Topics covered:** Wipro Turbo Quants, Wipro Turbo Verbal English, Wipro Turbo Logical Reasoning, Wipro Turbo Technical Computer coding.

## Feedback Form

Course Name: Intelli craft

Duration of the Course: 29/1/2019 to 3/2/2019

*(Please do not write your name. You are free to respond objectively)*

1. Please give your comments on the usefulness of the Workshop/guest Lecture/Seminar.

*This workshop is about crafting. Crafting is fully taught well.*

2. Please give your comments on the process/methods during the program.

*The guides told very simple techniques, simple way.*

3. What input areas were most useful to you ("which you have learnt/experienced during the programme)?

*The guides gave to students certain videos how to learn craft.*

4. In what input areas would you prefer to have further training?

*This workshop is very useful to students to improve our skills.*

5. Further Comments (if any)

*In this workshop very useful. Almost the students I picked the knowledge to the craft. Thankyou - Apesha.*

### Description:

The Department of Training & placement cell organized “Infosys Training”, and is specially meant for engineering final students. The sole objective of imparting aptitude training is to make students able to critically evaluate various real-life situations by resorting to an analysis of key issues and factors. This Aptitude Training helps them to demonstrate various principles involved in solving mathematical problems and thereby reducing the time taken for performing job functions. Logical reasoning is a test of a skill rather than a test of learned knowledge. This is used to determine a student’s critical thinking skills, as well as their ability to use their own knowledge to solve a problem. Soft Skills (a vital portion of an individual’s personality) is an intangible idea in which the qualities like attitude, ability, integrity, reliability, positivity, flexibility, dependability, punctuality, management, cooperation, habits and practices are combined proficiently to capitalize on a person’s work efficacy. Soft Skills do the work of combining all these components in accurate share into skills and shaping them into competencies. The aim of the coding is to produce high quality system which can be performed in any situation. The programmer removes all the errors related to syntax and format and all the logical errors which find in the programmer during the coding phase.

**Outcome of event:** After completing this training course, students will be able to

1. Enhance the Aptitude Round Clearing ability in interview process
2. Solve the real-time problems for performing job functions easily
3. Interpret the concepts of LOGICAL REASONING Skills
4. Develop effective communication skills (spoken and written).

**Feedback / Suggestions:** Students are participated in enthusiastic manner.

Planned to organize every year.

## **Department of CIVIL Engineering**

**Academic Year: 2018-19**

**Name of the Event:** Aptitude, Reasoning and verbal Ability

**Date:** 26.06.2018-30.06.2018

**Department:** CIVIL

**Academic Year:** 2018-19

**Topic:** Aptitude, Reasoning and verbal Ability

**Date of the Event:** 26.06.2018-30.06.2018

**Target Audience:** B. Tech All branch students

**Co-ordinator:** Nikhil Asst. Professor

**Description:**

The Department of Training & placement cell organized “Aptitude, Reasoning and verbal Ability”, and is specially meant for Engineering final students. This program is helpful to create awareness on best innovative practices and also impart technical knowledge among students about recent developments in Engineering and Science. The sole objective of imparting aptitude training is to make students able to critically evaluate various real-life situations by resorting to an analysis of key issues and factors. This Aptitude Training helps them to demonstrate various principles involved in solving mathematical problems and thereby reducing the time taken for performing job functions. Verbal reasoning is a test of a skill rather than a test of learned knowledge. This is used to determine a student’s critical thinking skills, as well as their ability to use their own knowledge to solve a problem.

**Outcomes of the Event:**

After completing this training course, students will be able to

1. Enhance the Aptitude Round Clearing ability in interview process
2. Solve the real-time problems for performing job functions easily
3. Interpret the concepts of LOGICAL REASONING Skills
4. Acquire satisfactory competency in use of VERBAL REASONING
