TO WHOMSOEVER IT MAY CONCERN

Ensuring academic integrity and preventing plagiarism are paramount concerns for educational institutions. In line with our commitment to upholding the highest standards of academic integrity, we have implemented measures to systematically check for plagiarism in undergraduate (UG) and postgraduate (PG) theses submitted by students affiliated with our Institution. While it is common for institutions to have their own licensed plagiarism software, we regret to inform you that we currently do not have a proprietary plagiarism detection tool in place. However, to fulfill our responsibility to maintain academic integrity, we are utilizing the privilege in our affiliated university (JNTU Kakinada) with a reputable third-party plagiarism detection software "Turnitin" for this purpose. We assure you that despite not having our plagiarism detection software at present, we are effectively addressing the issue by utilizing a reputable third-party solution, and we remain fully committed to complying with all plagiarism standards and requirements. This software enables us to thoroughly examine theses submitted by students across all academic disciplines, ensuring that scholarly work is original and properly attributed. We are diligent in our efforts to uphold academic honesty and ethical scholarship, and the utilization of this plagiarism detection software is a crucial component of our quality assurance procedures.

We recognize the importance of having robust systems in place for plagiarism detection and are actively exploring options for acquiring proprietary plagiarism software soon.
