MICT LIBRARY OPAC FACILITY FOR RESOURCE DATABASE

The Online Public Access Catalog (OPAC) is a computerized database containing information about materials available in a library's collection. Accessible from terminals within the library, on-campus terminals, or remotely via the internet, OPAC provides users with the ability to search and retrieve comprehensive bibliographic information for the library's holdings.

Users can efficiently locate documents by conducting searches using various parameters such as author's name, subject, keywords, or title. This user-friendly interface enables patrons to determine the availability of specific items, including books, CDs, or journals. Additionally, OPAC serves as a tool for users to regularly check their account status, and it facilitates the suggestion of new books for library procurement through personalized login accounts.
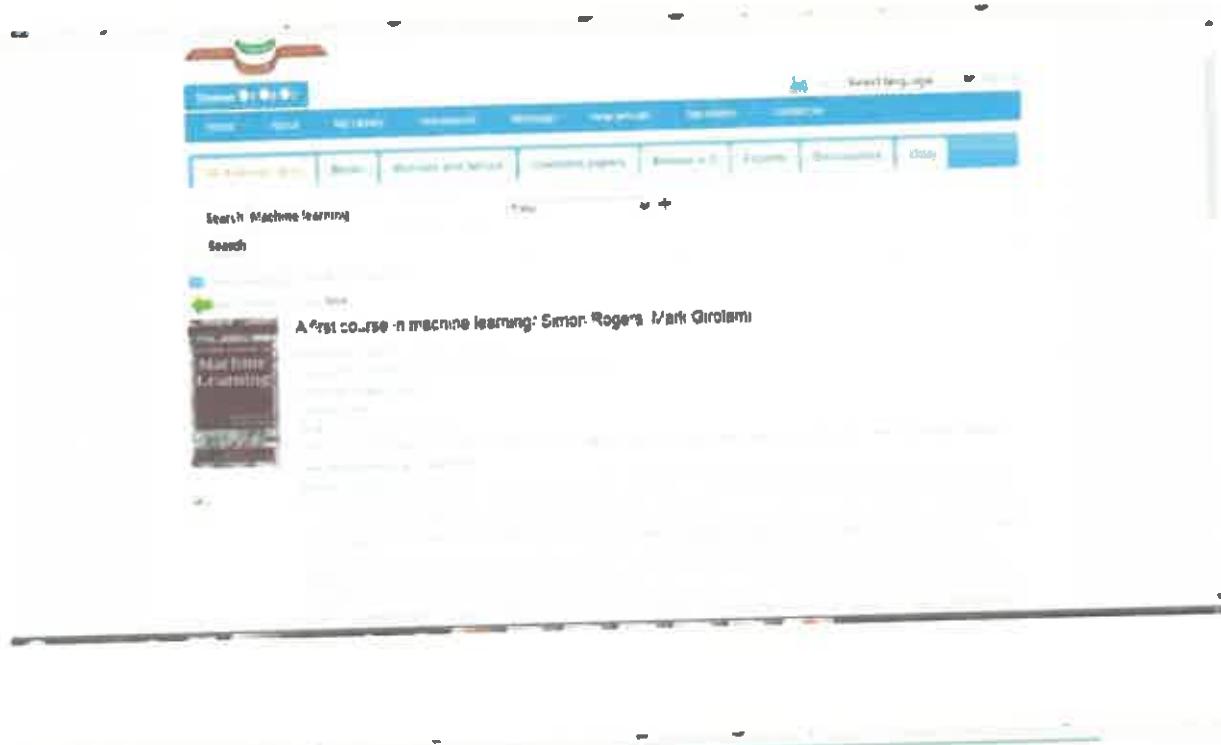

Whether accessing the system within the library premises or remotely, OPAC enhances the efficiency of information retrieval and empowers users to interact with the library's resources in a seamless and convenient manner.

MICT CENTRAL LIBRARY AND INFORMATION CENTER

Usage Report(2021-2022)

In the library, an average of 250 users, comprising both students and faculty members, visit daily to utilize the extensive range of resources available. The library employs a state-of-the-art biometric login system to manage user access efficiently. This cutting-edge technology ensures a secure and streamlined entry process for all library patrons.

The comprehensive data collected through the biometric login system is systematically stored and organized, forming the basis for a detailed monthly report. This report serves as a crucial tool for statistical analysis, allowing library administrators to gain a deep understanding of user trends, peak usage times, and popular resources.

By leveraging this data-driven approach, the library can make informed decisions to optimize resource allocation, improve user experience, and enhance overall operational efficiency.
